Provide High-Quality Reading Support This Summer

Dive into summer with Imagine Language & Literacy, a research-backed program designed to keep students engaged and learning. Our personalized reading instruction ensures each student's summer is filled with growth and discovery.

Reading, but make it fun: engage your students with playful, interactive reading games that not only enhance their comprehension skills but also build robust vocabulary and language skills, making reading an adventure.

Individualized learning journeys: each student embarks on a unique learning path, tailored to their reading level and pace. This ensures they're practicing the skills they need and are provided personalized attention and a customized educational experience.

Progress monitoring: track and celebrate every student's reading journey with an intuitive dashboard, providing insights into their achievements and areas for growth, ensuring targeted support throughout the summer.

Why language and literacy?

According to decades of science of reading research, skilled reading is the product of word recognition *and* language comprehension. Meaning if one area is weak, then reading comprehension is diminished. That's why it's critical to teach both literacy and language skills in tandem.

3 Easy Ways to Support Reading this Summer

1 **CAMP IMAGINE LANGUAGE & LITERACY**

Use one program to guide your summer small group reading tutoring:

- Allow Imagine Language & Literacy to run an initial diagnostic assessment, providing you with detailed skill gaps to target and setting each student on their own unique learning pathway
- Print offline resources and lessons related to the skills with which your students need extra support
- Create a summer station rotation, where students work individually on their personalized pathways and you pull 1–2 students at a time providing individualized attention

2 **ENHANCE EXISTING PROGRAMS**

Add Imagine Language & Literacy for 20–30 minutes a day, 2x a week to any existing summer learning camp or program you're running for easy and effective reading support.

3 **SUPPORT AT HOME (OR ON VACATION!):**

Provide login information to families over the summer so that kids can learn from their device at home and even on vacation!
